TERM FREQUENCY

The term frequency tool aids researchers in tracking central themes and ideas. Researchers can now see the frequency of their search term within a content set to begin assessing how individuals, events, and ideas interacted and developed over time.

TERM CLUSTER

The term cluster assists students in thoroughly developing their research topic. By identifying and organizing commonly occurring themes, this tool reveals hidden connections to search terms—helping students shape their research and integrate diverse content with relevant information.

SEARCH ASSIST

Detailed subject indexing guides students in gathering relevant information from multiple sources to expose connections that simple search and retrieve does not. Whether conducting a short or a sustained research project, students will easily perform advanced searches to synthesize and select appropriate information.

The ground-breaking research environment that brings newfound discovery, relevance, and simplicity

Named for the Greek goddess symbolizing new ideas, discovery, power, and ‘the hunt’, Gale Artemis is an unprecedented, seamlessly integrated research experience for users across all levels of expertise.
