Why Digital Matters

Making learning convenient and flexible for students means empowering them to study when and how they want. With 84% of college students preferring a blended learning environment, and 78% agreeing that technology contributes to successful learning,1 students clearly want to study online and on their mobile phones. Research shows they’re right.

1 EDUCAUSE Student Study 2016

MINDTAP

Through personalized paths of dynamic assignments and applications, MindTap® is a digital learning solution that turns cookie cutter into cutting edge, apathy into engagement, and memorizers into higher-level thinkers.

Built on principles of learning design and created hand-in-hand with educators, Cengage Learning solutions focus on engagement, taking students through the levels of application, analysis, and critical thinking with depth and context unmatched in the market.

Welding Simulations available only in MindTap!

MindTap includes meaningful interactivity such as Simulations. Before the spark hits the arc, make sure students know what they’re doing. Included in this three module activity are process driven simulations that focus on the preparation of a weld from the evaluation of blueprints to the proper setup and safety procedures for welding equipment.

A 3D inspection of materials concludes the activity, to provide remediation and promote analytical skills. Students will also analyze blueprints, set up workspaces, examine 3-D images of the work and welds, and get remediation and review necessary in real-world scenarios. Only available in MindTap.

Check Simulations out through your SSO account or visit the MindTap Simulation Station for select product demos at www.cengage.com/simulationstation

INSTRUCTOR RESOURCES

With Cengage Learning’s Instructor Resources to accompany many of our books, preparing for class and evaluating students has never been easier!
