

Configuring ClassLink for Gale Access

Users will need to create an app for Gale Resources using the following URL. There is an icon available in ClassLink's library for this app.

<http://link.galegroup.com/apps/launchClasslink/common>

For links to individual products, use the following URL recipe:

[http://link.galegroup.com/apps/launchClasslink/\[product code\]](http://link.galegroup.com/apps/launchClasslink/[product code])

example:

<http://link.galegroup.com/apps/launchClasslink/AONE>

Here is a list of currently supported individual apps for ClassLink: [List of Products for ClassLink](#)
