Printed in the United States of America

This *Reel Guide* accompanies the first shipment of the post-1967 International Population Census on microfilm. As a bibliography, the *Reel Guide* is heavily indebted to an already existing work, namely, *The International Population Census Bibliography: Revision and Update, 1945-1977* which was compiled by Doreen Goyer, librarian at the Population Research Center (PRC) at the University of Texas. The Population Research Center bibliography contains an awesome array of population information. All known census publications are included in a comprehensive numerical sequence. The International Population Census, Post 1967, Part I on microfilm is based on the original PRC bibliography and not on the recently published revised edition. A cross-reference list of corresponding entry identification numbers from the *Reel Guide* and the PRC revised bibliography can be found at the end of the guide.

It would be difficult to improve on the numbering system that was devised by the researchers at the PRC. That system, which assigns a two-part number to each entry, has been adopted in the *Reel Guide*. The first number is the year of the census and the second number is the entry's sequential order. A decimal point separates the two numbers. A title consisting of more than one volume is distinguished by the use of a hyphen followed by the volume order number. The following titles from the 1971 Hong Kong census illustrate the numbering system:

Hong Kong. Census and Statistics Department.
1971.1 The 1971 Census: a graphic guide. Hong Kong, Government Printer, [1972]. iii, 25 p.

Hong Kong. Census and Statistics Department.
Hong Kong population and housing census, 1971.
Hong Kong Government Printer, 1972-1974. 4 v.
1971.2-1 Basic tables. 1972. iii, 41 p.
1971.2-2 Main report. [1973]. v, 248 p., 2 maps.
1971.2-3 Technical report. [1973]. [8], 303 p., speciman forms.
1971.2-4 Transport characteristics. 1974. iii, 60 p., map.

Therefore, any entry may be uniquely identified by quoting the country name and its identification number; such as "Hong Kong 1971.1."

Letters from the alphabet are occasionally incorporated into this system if a series of titles compile one volume. A 1970 Finland census publication illustrates this usage.

Koulutus. (Education). 1974. 2 v.
1970.1-7a (Whole population, 14 years and over, persons with university degrees). 492 p.
1970.1-7b (Economically active population). 623 p.

The microfilm collection was assembled in accordance with the PRC numbering system. Each reel's title block and its box label record such information as the region, the country, the census year(s), the reel number and the inclusive item numbers contained on that reel. Though its format differs slightly from the box label, a sample reel title block reads:

International Population Census Publications
Region: Europe
Country: Greece
Census Year(s): 1971
Reel 1 of 2
Nos. 1971.1 thru 1971.3-3

Some countries with only a few census publications, e.g. Dominican Republic (1970), Guadeloupe (1967) and Paraguay (1972) are found on the same reel in the microfilm collection. In such cases, the countries are clearly distinguished from each other by individual title blocks which insure easy retrieval.

Many libraries and librarians have generously contributed their time and resources to the International Population Census on microfilm. We sincerely thank them all. Special mention, however, is due to Miss Doreen Goyer of the Population Research Center for her advice and expertise.

1971.4 *Popis stanovništva i stanova 1971. Program obrade i publikovanja–šeme tabeliranja, tabele i klasifikacije–.* [Census of population and housing 1971. Processing and publications program–Scheme of tabulation, tables and classification–.] Belgrade, 1975. 332 p.

This cross-reference list of entry identification numbers from the *International Population Census Publications, Post 1967,* on microfilm is intended to aid the researcher who wishes to use this guide in conjunction with *The International Population Census Bibliography: Revision & Update, 1945-1977* by Doreen Goyer, librarian of the Population Research Center, (PRC). The list lines up a Research Publications, Inc. guide entry with the identical PRC bibliography entry. The RPI entry is in the left-hand column with the corresponding PRC bibliography entry identification number in the right-hand column. The RPI entries are arranged alphabetically within continent and then chronologically within each country.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 6 of Segment III, which consists of statistical data for the following countries: Denmark, England and Wales, Great Britain, Iran, and Nicaragua. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

country name and capital/statistical agency/publications distributor

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 7 of Segment III, which consists of statistical data for the following countries: Austria, Commonwealth Caribbean, Egypt, Malaysia, and Spain. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 8 of Segment III, which consists of statistical data for the following countries: Argentina, Bahrain, Brazil, Colombia, Haiti, Italy, Malawi, Mauritius, Morocco, Reunion, South Korea, and Uruguay. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 9 of Segment III, which consists of statistical data for the following countries: Cook Islands, France, Ivory Coast, Jordan, Kenya, Kiribati, Mali, Mexico, Niue, Norfolk Islands, Northern Ireland, Peru, Rwanda, Saudi Arabia, Swaziland, Tanzania, Tuvalu, Vanuatu, and Vietnam. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 10 of Segment III, which consists of statistical data for the following countries: Afghanistan, Angola, Belgium, Benin, Cape Verde, Channel Islands, Chile, Christmas Island, Colombia, Cyprus, Czechoslovakia, German Democratic Republic, Gibraltar, Guinea-Bissau, Israel, Lesotho, Madagascar, Maldives, Mauritania, Mayotte Island, Monaco, Mongolia, Niger, Panama, Papua New Guinea, Poland, Portugal, Romania, St. Helena, San Marino, Sao Tome-Principe, Seychelles, Switzerland, Tonga, Turkey, Western Sahara, Western Somoa, Zaire, Zambia. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 11 of Segment III, which consists of statistical data for the following countries: Antigua, Bolivia, Bulgaria, Burkina Faso, Cameroon, Cuba, Dominican Republic, Ecuador, Ethiopia, Falkland Islands, Finland, French Polynesia, Guadeloupe, Ireland, Libya, Namibia, Nauru, New Caledonia, Paraguay, Sierra Leone, Somalia, Sri Lanka, Suriname, URRS, Western Samoa. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 12 of Segment III, which consists of statistical data for the following countries: Bangladesh, Greece, Guatemala, Jamaica, Kuwait, Liechtenstein, Norway, Pakistan, Philippines, Sweden, and United Arab Emirates. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In this system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 13 of Segment III, which consists of statistical data for the following countries: Algeria, Bhutan, Botswana, Central African Republic, Comoros, Costa Rica, Cuba, Faroe Islands, German Democratic Republic, Guadeloupe, Hong Kong, Indonesia, Isle of Man, Jamaica, Luxembourg, Macao, Maldives, Mauritius, Monaco, Mozambique, Nepal, New Zealand, Northern Ireland, Singapore, South Africa, Syria, Trinidad and Tobago, Tunisia, Uganda, Uruguay, Yemen (Sana'a). The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 14 of Segment III, which consists of statistical data for the following countries: AFRICA - Egypt, South Africa, LATIN AMERICA & THE CARIBBEAN - Mexico. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 15 of Segment III, which consists of statistical data for the following countries: AFRICA - Algeria, Burkina Faso, Equatorial Guinea, Gambia, St. Helena and Ascension, and Swaziland, ASIA -Brunei, India (Series 1-15), Sri Lanka, and Vietnam, EUROPE - Bulgaria, LATIN AMERICA & THE CARIBBEAN - Bahama Islands, Dominica, Falkland Islands, French Guiana, Grenada, and Guyana, OCEANIA -Kiribati, New Caledonia, Niue, Norfolk Island, Solomon Islands, Tokelau Islands, Tonga, and Wallis and Futuna. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

country name and capital/statistical agency/publications distributor

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 14 of Segment III, which consists of statistical data for the following countries: AFRICA - Egypt, South Africa, LATIN AMERICA & THE CARIBBEAN - Mexico. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

country name and capital/statistical agency/publications distributor

Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin
Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

catalog entry

Iran. Statistical Centre.
[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 17 of Segment III, which consists of statistical data for the following countries: AFRICA - LeSotho, Niger, Seychelles, South Africa, and Togo; EUROPE- Finland, and France; LATIN AMERICA & THE CARIBBEAN - Ecuador; OCEANIA - New Zealand. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

country name and capital/statistical agency/publications distributor

Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin
Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

catalog entry

Iran. Statistical Centre.
[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974.
2v.

breakdown of entry/ target no. = Population Research Center identification no.

[...urban areas]. 1973.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 18 of Segment III, which consists of statistical data for the following countries: ASIA- Iran and EUROPE- England and Wales, France, Northern Ireland, Scotland, and Switzerland. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 19 of Segment III, which consists of statistical data for the following countries: AFRICA-Ghana; EUROPE-Italy and LATIN AMERICA AND THE CARIBBEAN- Peru and Venezuela . The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 20 of Segment III, which consists of statistical data for the following countries: AFRICA-Burkina Faso, Ivory Coast, Rwanda, and Tanzania;ASIA-Nepal;EUROPE-CzechRepublic, Finland, Romania, and Spain;LATIN AMERICA AND THE CARIBBEAN-Anguilla, Barbados, Bermuda, El Salvador, Montserrat, Netherlands Antilles, St. Lucia, St. Vincent & the Grenadines and the Turks and Caicos Islands; OCEANIA-Cook Islands, Fiji Islands, French Polynesia, Kiribati, Niue, Palau, and the Tokelau Islands. The guide is formatted according to the numbering and cataloging system developed by Doreen Goyer. In the system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number on microfilm. In order to locate an item on film, scan the listing of publications, noting the reel and target number. Further explanation is provided in italics with the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 23 of Segment III, which consists of statistical data for the following countries: **AFRICA**: Central African Republic 1988, Chad 1993, Gabon 1969, 1971, Madagascar 1993, Mauritania 1988; **ASIA**: Bhutan 1988, Bangladesh 1991; **EUROPE**: Channel Islands 1991, Belgium 1991, Finland 1985, Isle of Man 1991, 1996; **LATIN AMERICA AND THE CARIBBEAN**: Agentina 1991, Barbados 1970, St. Lucia 1991, Bermuda Islands 1970, Martinique 1982, St. Vincent and Grenadines 1991, Brazil 1983-1986, 1990-1991, British Virgin Islands 1980, Panama 1990; **OCEANIA**: American Samoa 1980, 1990, Guam 1980, Northern Marian Islands 1990, Pitcarin Islands 1982.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran
	Plan and Budget Organization
	Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 23 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 23 of Segment III, which consists of statistical data for the following countries: **AFRICA**: Central African Republic 1988, Chad 1993, Gabon 1969, 1971, Madagascar 1993, Mauritania 1988; **ASIA**: Bhutan 1988, Bangladesh 1991; **EUROPE**: Channel Islands 1991, Belgium 1991, Finland 1985, Isle of Man 1991, 1996; **LATIN AMERICA AND THE CARIBBEAN**: Agentina 1991, Barbados 1970, St. Lucia 1991, Bermuda Islands 1970, Martinique 1982, St. Vincent and Grenadines 1991, Brazil 1983-1986, 1990-1991, British Virgin Islands 1980, Panama 1990; **OCEANIA**: American Samoa 1980, 1990, Guam 1980, Northern Marian Islands 1990, Pitcarin Islands 1982.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran
	Plan and Budget Organization
	Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 23 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 23 of Segment III, which consists of statistical data for the following countries: **AFRICA**: Central African Republic 1988, Chad 1993, Gabon 1969, 1971, Madagascar 1993, Mauritania 1988; **ASIA**: Bhutan 1988, Bangladesh 1991, Hong Kong 1986, 1991; **EUROPE**: Channel Islands 1991, Belgium 1991, Finland 1985; **LATIN AMERICA AND THE CARIBBEAN**: Agentina 1991, Barbados 1970, St. Lucia 1991, Bermuda Islands 1970, Martinique 1982, St. Vincent and Grenadines 1991, Brazil 1983-1986, 1990-1991, British Virgin Islands 1980, Panama 1990; **OCEANIA**: American Samoa 1980, 1990, Guam 1980, Northern Marian Islands 1990, Pitcairn Islands 1982, Papua New Guinea 1990.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran
	Plan and Budget Organization
	Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 23 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, apart of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 24 of Segment III, which consists of statistical data for the following countries: **ASIA:** Bangladesh 1991, Philippines 1990, 1995; **EUROPE:** Greece 1991, Poland 1988.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran
	Plan and Budget Organization
	Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 21, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 24 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 26 of Segment III, which consists of statistical data for the following countries: **AFRICA:** Algeria 1988, Benin 1992, Bophuthatswana 1985, Burkina Faso 1984-89, 1985, Burundi 1979, 1990, Egypt 1996, Gambi 1983, 1993, Kenyo 1989, Malawi 1987, Mali 1987, Maritius 1992, Morocco, 1982, 1994, Mozambique 1991, Sudan 1983, 1993, Tanzania 1988, Uganda 1980, Zambia 1990, 1992; **ASIA:** Iran, 1982-1987, 1987-1993, 1991, Jordan 1994, Kazakhstan 1939, 1959, 1970, 1979, 1989, Turkey 1990; **EUROPE:** Albania 1989, Greece 1991, Luxembourg 1991, Russia 1994, Slovakia 1991, Switzerland 1990; **LATIN AMERICA AND THE CARIBBEAN:** Bristish Virgin Islands 1991, Chile 1991, 1992, Cuba 1987, Dominican Republic 1993, Falkland Islands 1991, French Polynesia 1988, Kiribati 1990, 1995, Netherlands Antille 1981; Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran
	Plan and Budget Organization
	Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 21, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 25 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

Cameroun

Capital: Yaoundé

Statistical Agency: The Direction nationale du deuxieme recensement general de la population et de l'habitat

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 26 of Segment III, which consists of statistical data for the following countries: **AFRICA:** Algeria 1988, Benin 1992, Bophuthatswana 1985, Burkina Faso 1984-89, 1985, Burundi 1979, 1990, Egypt 1996, Gambi 1983, 1993, Kenya 1989, Malawi 1987, Mali 1987, Maritius 1992, Morocco, 1982, 1994, Mozambique 1991, Sudan 1983, 1993, Tanzania 1988, Uganda 1980, Zambia 1990, 1992; **ASIA:** Iran, 1982-1987, 1987-1993, 1991, Jordan 1994, Kazakhstan 1939, 1959, 1970, 1979, 1989, Turkey 1990; **EUROPE:** Albania 1989, Greece 1991, Luxembourg 1991, Russia 1994, Slovakia 1991, Switzerland 1990; **LATIN AMERICA AND THE CARIBBEAN:** British Virgin Islands 1991, Chile 1991, 1992, Cuba 1987, Dominican Republic 1993, Falkland Islands 1991, French Polynesia 1988, Kiribati 1990, 1995, Netherlands Antilles 1981.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry as follows:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin
Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.
[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 21, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations. An example of the new guide entries follows below:

Yugoslavia. 1981.
Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava I steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 26 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 27 of Segment III, which consists of statistical data for the following countries: **AFRICA:** Sierra Leone 1985, **ASIA:** Kuwait 1985, Maldives 1985, 1990, Thailand 1980, 1990, **EUROPE:** Estonia 1979, 1989.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran Plan and Budget Organization Iran Novin
	Tehran
Publications Distributor:	Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 27 incorporates materials and entry formats from four institutions: the Population Research Center, the Office of Population Research (Princeton University), the Government Documents Division of Widener Library (Harvard University), Stanford University Library, and the Government Information Section of the University of California-Berkeley Library.

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 28 of Segment III, which consists of statistical data for the following countries: **ASIA:** Thailand 1970, 1990, **NORTH AMERICA:** Canada 1976, 1981.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

INTRODUCTION

International Population Census Publications, published by Primary Source Media, a part of Gale, Cengage Learning, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 29 of Segment III, which consists of statistical data for the following countries: **NORTH AMERICA:** Canada 1971, 1981, 1986.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran Plan and Budget Organization Iran Novin Tehran
Publications Distributor:	Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 29 incorporates materials and entry formats from Statistics Canada.

Canada
Capital: Ottawa
Statistical Agency: Statistics Canada.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 30 of Segment III, which consists of statistical data for the following country: **NORTH AMERICA:** Canada 1986, 1991.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital:	Tehran
Statistical Agency:	Statistical Centre of Iran Plan and Budget Organization Iran Novin Tehran
Publications Distributor:	Bureau of Supervision and International Relations (of the above)

Catolog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].

2 v.

Breakdown of Entry/Target No.=Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196 p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini :
Tabela 153 : domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku ; [rukopis pripremili Ruza Milic ... et al.].
Beograd : Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 30 incorporates materials and entry formats from Statistics Canada.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to unit 31 of Segment III, which consists of statistical data for the following countries: **NORTH AMERICA:** Canada 1991, 1996; Mexico 1991; and **OCEANIA:** Australia 1976, 1981, 1986, 1991, 1996.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran

(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 31 incorporates materials and entry formats from the University of California at Berkeley, the Office of Population Research at Princeton University, the Stanford University Library, and Statistics Canada.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 32 of Segment III, which consists of statistical data for the following countries: **NORTH AMERICA:** Mexico 1991, 1995, 2000; and **OCEANIA:** Australia 1991.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer=s system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry=s sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 33 of Segment III, which consists of statistical data for the following countries: **AFRICA:** Ethiopia 1994; **ASIA**: Pakistan 1951-1981, 1951-1998, and 1998; **NORTH AMERICA:** Canada 2001; and Mexico 1995, and 2000; **SOUTH AMERICA:** Brazil 1996.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 33 incorporates materials and entry formats from the Stanford University Library and Statistics Canada.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Two units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 34 of Segment III, which consists of statistical data for the following countries: **ASIA:** India, 1981; **LATIN AMERICA AND THE CARIBBEAN:** Nicaragua, 1995; and Panama 2000; **NORTH AMERICA:** Mexico 2000; **SOUTH AMERICA:** Brazil 2000.

Since the inception of this microfilm collection the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 34 incorporates materials and entry formats from the Stanford University Library, and the University of California at Berkeley.

Introduction…… *iv*

ASIA

India 1981……..…..……..1-11

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 35 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 35 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 36 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 37 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 37 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 38 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 38 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 39 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 39 incorporates materials and entry formats from the University of California at Berkeley.

Introduction…… *iv*

ASIA

India 1981……..…..……..1-11

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 40 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 40 incorporates materials and entry formats from the University of California at Berkeley.

Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 41 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1981.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 41 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale Cengage Learning* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 42 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1991.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 42 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 44 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1991.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 44 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 45 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1991.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 45 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 46 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1991.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 46 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 47 of Segment III, which consists of statistical data for the following country: **ASIA:** India, 1991.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Unit 47 incorporates materials and entry formats from the University of California at Berkeley.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 48 of Segment III, which consists of statistical data for the following country: **EUROPE:** USSR, 1989; **ASIA:** Turkey, 2000; **AFRICA:** Tanzania, 2002; **ASIA:** People's Republic of China, 2000.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Europe:

USSR
Capital: Moscow
Statistical Agency: Statistical Committee of the Commonwealth of Independent States.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 49 of Segment III, which consists of statistical data for the following country: **ASIA:** People's Republic of China, 2000.**EUROPE:** Russian Federation 2002.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Tabulation on the 2000 Population Census of

Heilongjiang

Province. 558 pgs.
(2000.1-34).

Reel 6
Tabulation

Henan sheng 2000 nian renkou pucha ziliao =

on the 2000 Population Census of Henan Province. 767
pgs.
(2000.1-35).

Henan sheng 2000 nian renkou pucha ziliao =

Tabulation

on the 2000 Population Census of Henan Province. 744
pgs.
(2000.1-36).

Reel 7
Tabulation

Hubei sheng 2000 nian renkou pucha ziliao =

on the 2000 Population Census of Hubei Province. 977
pgs.
(2000.1-37).

Tabulation	Hubei sheng 2000 nian renkou pucha ziliao = on the 2000 Population Census of Hubei Province. 904 pgs. (2000.1-38).
Reel 8 Tabulation	Hubei sheng 2000 nian renkou pucha ziliao = on the 2000 Population Census of Hubei Province. 540 pgs. (2000.1-39).
Tabulation	Hunan sheng 2000 nian renkou pucha ziliao = on the 2000 Population Census of Hunan Province. 807 pgs. (2000.1-40).
Reel 9 Tabulation	Hunan sheng 2000 nian renkou pucha ziliao = on the 2000 Population Census of Hunan Province. 914 pgs. (2000.1-41).
Tabulation	Jiangsu sheng 2000 nian renkou pucha ziliao = on the 2000 Population Cenus of Jiangsu Province. 1048 pgs. (2000.1-42).
Reel 10 Tabulation	Jiangsu sheng 2000 nian renkou pucha ziliao = on the 2000 Population Cenus of Jiangsu Province. 1112 pgs. (2000.1-43).
Reel 11 Tabulation	Jiangsu sheng 2000 nian renkou pucha ziliao = on the 2000 Population Cenus of Jiangsu Province. 905 pgs. (2000.1-44).
Tabulation	Jiangxi sheng 2000 nian renkou pucha ziliao = on the 2000 Population Cenus of Jiangxi Province. 807 pgs.

(2000.1-45).

Reel 12 Jiangxi sheng 2000 nian renkou pucha ziliao =
Tabulation on the 2000 Population Cenus of Jiangxi Province. 535
pgs. (2000.1-46).

Jilin sheng 2000 nian renkou pucha ziliao = Tabulation
on the 2000 Population Cenus of Jilin Province. 422 pgs.
(2000.1-47).

Jilin sheng 2000 nian renkou pucha ziliao = Tabulation
on the 2000 Population Cenus of Jilin Province. 438 pgs.
(2000.1-48).

Reel 13 Jilin sheng 2000 nian renkou pucha ziliao = Tabulation
on the 2000 Population Cenus of Jilin Province. 454 pgs.
(2000.1-49).

Jilin sheng 2000 nian renkou pucha ziliao = Tabulation
on the 2000 Population Cenus of Jilin Province. 537 pgs.
(2000.1-50).

Liaoning sheng 2000 nian renkou pucha ziliao =
Tabulation on the 2000 Population Census of Liaoning Province.
558 pgs.
(2000.1-51)

Reel 14 Liaoning sheng 2000 nian renkou pucha ziliao =
Tabulation on the 2000 Population Census of Liaoning Province.
680 pgs.
(2000.1-52).

Neimenggu zizhiqu 2000 nian renkou pucha ziliao =
Tabulation on the 2000 Population Census of Mongolia
Autonomous Region. 969 pgs.

(2000.1-53).

Reel 15 Neimenggu zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Mongolia Autonomous Region. 1015 pgs.
(2000.1-54).

Reel 16 Neimenggu zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Mongolia Autonomous Region. 1012 pgs.
(2000.1-55).

Reel 17 Ningxia hui zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Ningxia Hui Autonomous Region. 719 pgs.
(2000.1-56).

Ningxia hui zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Ningxia Hui Autonomous Region. 902 pgs.
(2000.1-57).

Reel 18 Qinghai sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Qinghai Province. 841 pgs.
(2000.1-58).

Qinghai sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Qinghai Province. 835 pgs.
(2000.1-59).

Reel 19 Qinghai sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Qinghai Province. 627 pgs.
(2000.1-60).

Shaanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shaanxi Province. 535 pgs.
(2000.1-61).

Reel 20 Shaanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shaanxi Province. 566 pgs.
(2000.1-62).

Shaanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shaanxi Province. 599 pgs.
(2000.1-63).

Shaanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shaanxi Province. 482 pgs.
(2000.1-64).

Reel 21 Shandong sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shandong Province. 1351 pgs.
(2000.1-65).

Reel 22 Shandong sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shandong Province. 1353 pgs.
(2000.1-66).

Reel 23 Shandong sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shandong Province. 1314 pgs.
(2000.1-67).

Reel 24 Shanghai shi 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shanghai Municipality. 724 pgs.
(2000.1-68).

Shanghai shi 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shanghai Municipality. 589 pgs.
(2000.1-69).

Reel 25
Tabulation

Shanghai shi 2000 nian renkou pucha ziliao =

on the 2000 Population Census of Shanghai Municipality. 422 pgs.
(2000.1-70).

Tabulation

Shanxi sheng 2000 nian renkou pucha ziliao =

on the 2000 Population Census of Shanxi Province. 595 pgs.
(2000.1-71).

Tabulation

Shanxi sheng 2000 nian renkou pucha ziliao =

on the 2000 Population Census of Shanxi Province. 595 pgs.
(2000.1-72).

Reel 26

Shanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shanxi Province. 520 pgs.
(2000.1-73).

Shanxi sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Shanxi Province. 555 pgs.
(2000.1-74).

Sichuan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Sichuan Province. 811 pgs.
(2000.1-75).

Reel 27

Sichuan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Sichuan Province. 636 pgs.
(2000.1-76).

Tianjin shi 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Tianjin Municipality. 1180 pgs.

(2000.1-77).

Reel 28

Xinjiang weiwuer zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Xinjiang Uygur Autonomous Region. 981 pgs.
(2000.1-78).

Xizang zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Xizang Autonomous Region. 475 pgs.
(2000.1-79).

Reel 29

Xizang zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Xizang Autonomous Region. 545 pgs.
(2000.1-80).

Xizang zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Xizang Autonomous Region. 476 pgs.
(2000.1-81).

Xizang zizhiqu 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Xizang Autonomous Region. 474 pgs.
(2000.1-82).

Reel 30

Yunnan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Yunnan Province. 657 pgs.
(2000.1-83).

Yunnan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Yunnan Province. 730 pgs.
(2000.1-84).

Reel 31

Yunnan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Yunnan Province. 544 pgs.
(2000.1-85).

Yunnan sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Yunnan Province. 575 pgs.
(2000.1-86).

Zhejiang sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Zhejiang Province. 539 pgs.
(2000.1-87).

Reel 32

Zhejiang sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Zhejiang Province. 481 pgs.
(2000.1-88).

Zhejiang sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Zhejiang Province. 422 pgs.
(2000.1-89).

Zhejiang sheng 2000 nian renkou pucha ziliao = Tabulation on the 2000 Population Census of Zhejiang Province. 442 pgs.
(2000.1-90).

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 50 of Segment III, which consists of statistical data for the following country: **EUROPE:** Russian Federation 2002.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning*, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 51 of Segment III, which consists of statistical data for the following country: **EUROPE:** Russian Federation 2002; Russian Federation 1994; **ASIA:** Indonesia 2000; People's Republic of China 1990; People's Republic of China 2000.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

Housing Conditions of the Population of the Republic Kalmykia: According to the Data of the Population Microcensus of 1994. 18 pgs.
(1994.3-97).

Basic Results of the Population Microcensus of 1994 for the Republic Kalmykia. 31 pgs.
(1994.3-98).

Basic Characteristics of the Population Microcensus of the Republic of Karachâevo-Cherkesia in 1994: (Brief Statistical Abstract). 41 pgs.
(1994.3-99).

Marital Status and Births in the Krasnodar Territory: (According to the Data of the Population Microcensus of 1994). 55 pgs.
(1994.3-100).

Education of the Population of the Krasnodar Territory: (According to the Data of the Population Microcensus of 1994). 35 pgs.
(1994.3-101).

Distribution of the Population of the Krasnodar Territory by Knowledge of Languages: (According to the Data of the Population Microcensus of 1994). 38 pgs.
(1994.3-102).

Income Sources of the Population of the Krasnodar Territory: (According to the Data of the Population Microcensus of 1994). 43 pgs.
(1994.3-103).

Types and Structure of Households in the Krasnodar Territory: (According to the Data of the Population Microcensus of 1994). 36 pgs.
(1994.3-104).

Length of Stay of the Population of the Krasnodar Territory in the Place of Permanent Residence: (According to the Data of the Population Microcensus of 1994). 24 pgs.
(1994.3-105).

Housing Conditions of the Population of the Krasnodar Territory: (According to the Data of the Population Microcensus of 1994). 36 pgs.
(1994.3-106).

Basic Results of the Population Microcensus of 1994 for the Krasnodar Territory, the Rostov Region, the Stavropol' Territory and the Republic Adygeia. 19 pgs.
(1994.3-107).

Basic Results of the Population Microcensus of 1994 Volume 1. 64 pgs.
(1994.3-108).

Basic Results of the Population Microcensus of 1994. 62 pgs.
(1994.3-109).

Basic Results of the Population Microcensus of 1994 in the Stavropol' Territory: (Analytical Note with Table Supplement). 44 pgs.
(1994.3-110).

Basic Results of the Population Microcensus of 1994. 63 pgs.
(1994.3-111).

Basic Results of the Population Microcensus of 1994 in the Rostov Region: (Analytical Materials and Tables). 41 pgs.
(1994.3-112).

Types and Structure of Households in Bashkortostan: (According to the Data of the Population Microcensus of 1994). 158 pgs.
(1994.3-113).

Reel 24

Brief Results of the Population Microcensus of 1994. 149 pgs.
(1994.3-114).

Basic Results of the Population Microcensus of 1994: The Republic Mari El: Statistical Abstract. 57 pgs.
(1994.3-115).

Basic Results of the Population Microcensus of 1994. 28 pgs.
(1994.3-116).

Income Sources of the Population of the Chuvash Republic: (According to the Data of the Population Microcensus of 1994). 21 pgs.
(1994.3-117).

Types and Structure of Households in the Chuvash Republic: (According to the Data of the Population Microcensus of 1994). 36 pgs.
(1994.3-118).

Basic Results of the Population Microcensus of 1994 for the Chuvash Republic. 63 pgs.
(1994.3-119).

Basic Results of the Population Microcensus of 1994: Marriage and Family. 90 pgs.
(1994.3-120).

Marriage and Births in the Kirov Region: (According to the Data of the Population Microcensus of 1994): Statistical Bulletin. 42 pgs.
(1994.3-121).

Basic Results of the Population Microcensus of the Kirov Region: Statistical Abstract. 44 pgs.
(1994.3-122).

Marriages and Births in the Penza Region: (According to the Data of the Population Microcensus of 1994). 39 pgs.
(1994.3-124).

Types and Structure of Households in the Penza Region: According to the Data of the Population Microcensus of 1994. 22 pgs.
(1994.3-125).

Housing Conditions of the Population of the Penza Region According to the Data of the Population Microcensus of 1994. 25 pgs.
(1994.3-126).

Brief Review of the Basic Results of the Population Microcensus of 1994 in the Penza Region. 72 pgs.
(1994.3-127).

Basic Results of the Population Microcensus of 1994. 70 pgs.
(1994.3-128).

Basic Results of the Population Microcensus of 1994. 80 pgs.
(1994.3-129).

Basic Results of the Population Microcensus of 1994. 52 pgs.
(1994.3-130).

Basic Results of the Population Microcensus of 1994. 77 pgs.
(1994.3-131).

Brief social-demographic charachteristics of the population of Kurgan province: (according to the data of the Population Microcensus of 1994). 37 pgs.
(1994.3-132).

On some problems of the women of Kurgan province: based on materials of the selective social-demographic inspection of 1994. 19 pgs.
(1994.3-133).

Basic Results of the Population Microcensus of 1994. 47 pgs.
(1994.3-134).

Nationalities of the Population of the Region; Knowledge of Languages: Microcensus. 63 pgs.
(1994.3-135).

Sex, Age of the Population of the Region: Microcensus. 21 pgs.
(1994.3-136).

Income Sources of the Population of the Region: Microcensus. 61 pgs.
(1994.3-137).

Length of Stay of the Population in the Place of Permanent Residence: Microcensus. 81 pgs.
(1994.3-138).

Types and Structure of Households of the Sverdlovsk Region. 46 pgs.
(1994.3-139).

Reel 25

Level of Education of the Population of the Region: Microcensus. 59 pgs.
(1994.3-140).

Housing Conditions of the Population of the Region: Microcensus. 85 pgs.
(1994.3-141).

The Population of Working Age of the Sverdlovsk Region: Micricensus. 87 pgs.
(1994.3-142).

Marital Status of the Population of the Region: Microcensus. 53 pgs.
(1994.3-143).

The Ural Area: (Analytical-Statistical Materials of the Microcensus of 1994). 167 pgs.
(1994.3-144).

Land Availability of the Population: Microcensus. 92 pgs.

Introduction…… *iv*

ASIA:

People's Republic of China 2000……1-11

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 52 of Segment III, which consists of statistical data for the following country: **ASIA:** People's Republic of China 2000.

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 53 of Segment III, which consists of statistical data for the following countries: Europe**:** Bulgaria 2001
Europe: Serbia 2002
Africa: Republic of Zambia 2000
Africa: Ghana 2000
Asia: India 2001

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning*, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 54 of Segment III, which consists of statistical data for the following countries: Europe**:** Estonia 2000
Europe: Republic of Cyprus 2002, 2003, 2004
Europe: Sweden 2004, 2006
Europe: Scotland 2000, 2001, 2002, 2003, 2004, 2005, 2006
Europe: Norway 1997, 1998, 1999, 2000, 2001, 2003, 2004, 2005, 2006
Europe: Hungary 2001, 2002, 2003, 2004, 2005, 2006, 2007
Africa: Mozambique 1997
Africa: South Africa 1991, 1995, 2001, 2002, 2004, 2005
Africa: Lesotho 2000, 2001, 2002
Asia: Thailand 2000
Asia: India 2001, 2002, 2003, 2004, 2005, 2006, 2007
Latin America and the Caribbean: Belize 1999, 2000, 2001, 2002
Latin America and the Caribbean: Paraguay 1972, 1982

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning*, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 55of Segment III, which consists of statistical data for the following countries: Europe**:** Bosnia and Herzegovina, 2004, 2005, 2006, 2007
Latin America and the Caribbean: Dominican Republic, 2002
Oceania: Australia, 1992, 1994-2007
Oceania: New Zealand, 1996, 2001, 2006
Oceania: Northern Mariana Islands, 1973, 1980, 1990, 1992, 1997-2000, 2002
Europe: Bosnia and Herzegovina, 2004-2007
North America: Canada, 1996-2001, 2003-2007
Latin America and the Caribbean: Dominican Republic, 2002

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor
Islamic Republic of Iran
Capital: Tehran
Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran
Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning*, is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 56 of Segment III, which consists of statistical data for the following countries: Europe**:** Malta, 2000, 2002, 2003, 2004, 2005
Latin America and the Caribbean: Dominican Republic, 2004 -2006
Africa: Republic of Mauritius, 2000-2006
Africa: Malawi, 1998, 2000, 2004-2006
Africa: Republic of Gambia, 1993, 1998, 2000, 2001, 2003-2006,
Africa: South Africa, 1993, 1996-2000, 2002-2003, 2006-2007
Africa: Cameroon, 2004-2006
Africa: Burkina Faso, 1993, 1996-2006
Latin America and the Caribbean: Brazil, 1991, 1997. 1999-2005
Africa: Republic of Senegal, 2001, 2003-2006
Africa: Zambia, 1998, 2000, 2002
Africa: Chad, 2000-2002, 2004, 2006
Africa: Republic of the Congo, 1998, 2001, 2003-2006
Europe: Gibraltar, 1996, 2001-2006
Latin America and the Caribbean: Saint Lucia, 1996-2005
Asia: Timor-Leste, 2003-2004, 2006
Asia: Indonesia, 2000, 2002-2007
Europe: Romania, 2002, 2004-2005
Europe: Albania, 2001-2002, 2005
Europe: Republic of Macedonia, 2000, 2002-2006
Asia: Singapore, 1990-1991, 1993, 1995, 1997-2001, 2003-2007

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 57 of Segment III, which consists of statistical data for the following countries: Europe**:** Faroe Islands 1999
Denmark: 2000-2007
Czech Republic: 2003, 2005-2006
Poland: 2004-2006
Republic of Slovenia: 2002-2007
Croatia: 2005-2007
Austria: 1999-2007

Latin America and the Caribbean: Chile: 1950, 1990, 1992, 1999-2000, 2002-2006

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry

Iran. Statistical Centre.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 58 of Segment III, which consists of statistical data for the following countries: Europe**:** Lithuania: 2000, 2002-2007
Isle of Man:2000-2007
Jersey: 2000-2008
Guernsey: 1998, 2001, 2003-2007
Northern Ireland: 2001-2004
Latin America and the Caribbean: Costa Rica: 1987, 1992, 1998, 2000-2007
Asia: Mongolia: 1990-1992, 1994-2007
Cambodia: 1996-2008
Oceania: American Samoa: 2000, 2002-2006

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry

Iran. Statistical Centre.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 59 of Segment III, which consists of statistical data for the following countries: Ocenia**:** Cook Island: 1996, 1999-2007
Fiji Islands: 2002-2006
French Polynesia: 2002, 2004
Nauru: 1992
Guam: 1990, 1992, 1997, 2000, 2002
Samoa: 2001-2003, 2005-2006
Solomon Islands: 2003, 2005-2007
Republic of Kiribati: 2005
Marshall Islands: 1973, 2000-2006
Northern Mariana Islands: 1990, 1992, 1997, 2000, 2002
Federated States of Micronesia: 1996-2002, 2004-2005
Tokelau: 2005-2006
Tuvalu: 1994, 1996, 2002-2006
Tonga: 2001-2006
Republic of Palau: 1995, 1997, 2000, 2002-2005
New Caledonia: 2002-2003, 2007
Niue: 1996-1997, 2001-2007
Asia: Bhutan: 1980, 1990-1991, 2000-2001, 2003-2007
Bangladesh: 2000-2007
Sri Lanka: 1997, 2000-2008
Lebanon: 2004-2006
United Arab Emirates: 1979-2007

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry

Iran. Statistical Centre.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** *a part of Gale, Cengage Learning,* is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 60 of Segment III, which consists of statistical data for the following countries: Europe:

Canary Islands: 2002-2007
Basque: 1985, 1990-1991, 1995-2007
Madeira: 2001-2007
Azores: 2000-2006
Spain: 1980-2007

Africa: Cape Verde: 19972007

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry

Iran. Statistical Centre.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.

[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.

INTRODUCTION

International Population Census Publications, published by **Primary Source Media,** a part of Gale, Cengage Learning is a collection of census data on microfilm. Segment I of the collection is comprised of material from the years 1945-1967. Segment II, a retrospective continuation of Segment I, contains materials published prior to 1945 and includes rare data from censuses taken as early as the sixteenth century. Segments I and II are based on the International Population Census Bibliography, compiled by Doreen Goyer of the Population Research Center at the University of Texas, Austin. Segment III is based on the International Population Census Bibliography: Revision and Update, 1946-1977, also by Doreen Goyer. Segment III is currently in process and consists of post-1967 census data.

The collection is published on 35mm silver halide microfilm at a reduction ratio of 14x to 17x and meets all ANSI and AIIM specifications for archival permanence. Units consisting of approximately 50 reels each are published annually.

This guide provides access to Unit 61 of Segment III, which consists of statistical data for the following countries: Europe:

SPAIN: 1968-2007
ITALY: 1998-2007

Since the inception of this microfilm collection, the bibliographic entries in the guides have been formatted according to the numbering and cataloging system developed by Doreen Goyer and maintained by the Population Research Center, which has also functioned as the major sourcing institution. In Doreen Goyer's system, the catalog entry appears first, in order by census year. Immediately following is a detailed breakdown of the entry, accompanied by a two-part number. The first part of the number, preceding the decimal point, is the year that the census was taken. The second part, following the decimal point, represents the entry's sequential order within the census. This number serves as the target number of the microfilm. In order to locate an item on film, scan the listing of the publications, noting the reel and target number. Further explanation is provided in italics by the sample entry below:

Country Name and Capital/Statistical Agency/Publications Distributor

Islamic Republic of Iran

Capital: Tehran

Statistical Agency: Statistical Centre of Iran
Plan and Budget Organization
Iran Novin

Tehran

Publications Distributor: Bureau of Supervision and International Relations (of the above)

Catalog Entry **Iran. Statistical Centre**.

[Current population sample survey in 1971 for urban areas and total country].
(Persian edition). Tehran, 1973-1974
2 v.

Breakdown of Entry/Target No. = Population Research Center Identification No.
[... urban areas]. 1973.
vii, 196p.
(1971.1-1)

Beginning with Unit 23, new sourcing of census materials will draw heavily upon the holdings of other research institutions, and the bibliographic entries for the guides will reflect their cataloging records. While these will not be formatted in the traditional manner, they will supply basic access and bibliographic control: name of country and census year, author (personal or corporate), full title and statement of responsibility, edition statement (if relevant), place of publication and issuing agency, imprint year, pagination, and illustrations.

An example of the new guide entries follows below:

Yugoslavia. 1981.

Popis stanovnistva, domacinstava I stanova u 1981. godini:
Tabela 153: domacinstva koja imaju poljoprivredno gazdinstvo prema ukopno koriscenoj povrsini zemljista, broju clanova koji cine poljoprivrednu radnu snagu, ukupnom broju konja, goveda, krava i steonih junica (SFRJ, SR I SAP) / Socijalisticka Federativna Republika Jugoslavija, Savezni zavod za statistiku; [rukopis pripremili Ruza Milic... et al].
Beograd: Savezni zavod za statistiku, 1986.
iii, 60 p.; 20x29cm.
