Decimal Files 763, 863, and 963**

Scholarly Resources has published on microfilm the U.S. Department of State Decimal Files 763, 863, and 963 collectively entitled *Records Relating to the Internal Affairs of Austria* for the years 1950-1954.

The materials in this Decimal File have been microfilmed in the exact order and condition in which they appear in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed from the file prior to filming and have been replaced with notes indicating their absence.

Decimal Files 763, 863, and 963 are part of the General Records of the Department of State, National Archives, Record Group 59.

The documents in these files are primarily instructions to and despatches from U.S. diplomatic and consular staff regarding political, economic, military, social, and other internal conditions and events in Austria. Other types of material represented are reports and memoranda prepared by State Department staff, communications between the State Department and foreign governments, and correspondence with other departments of the U.S. government, private firms, and individuals.

THE DECIMAL FILING SYSTEM

From 1910 to 1963, the State Department used a decimal filing system to organize its central files, which consequently became known as the Decimal Files. This filing system is designed to permit access to documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject.

Class. There are ten numbered classes in the decimal filing system of this period, each of which designates a very broad subject area. These are:

Class 0:	Miscellaneous
Class 1:	Administration of the U.S. Government
Class 2:	Protection of Interests (Persons and Property)
Class 3:	International Conferences, Congresses, Meetings and Organizations, United Nations, Organization of American States, Multinational Treaties
Class 4:	International Trade and Commerce, Trade Relations, Treaties, Agreements, Customs Administration
Class 5:	International Informational and Educational Relations, Cultural Affairs and Programs
Class 6:	International Political Relations, Other International Relations
Class 7:	Internal Political and National Defense Affairs
Class 8:	Internal Economic, Industrial, and Social Affairs
Class 9:	Other Internal Affairs, Communications, Transportation, Science

The records reproduced in this publication are from Classes 7, 8, and 9.

Country. The decimal filing system continues by assigning a number to each country, as well as to some larger geographic areas. The United States, for example, is always represented by the number 11. The country number for Austria is 63.

Subject. Records are organized according to a very precise subject classification system, in which each subject is assigned a number. The generic numerical-subject classification for Classes 7, 8, and 9 records begins on page 1 of this Guide, and an alphabetical subject index begins on page 19.

File Periodization

The State Department divided its Decimal Files into arbitrary sections by date: 1910-1929, 1930-1939, 1940-1944, 1945-1949, 1950-1954, 1955-1959, and 1960-1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that Decimal Files are organized in these multiyear sections and cannot be accessed by individual year.

Document File Numbers

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 863, is shown below:

8	63	.	24	/	10-350
(1)	(2)		(3)		(4)

- (1) Class Number. This document is part of Class 8, pertaining to internal economic, industrial, and social affairs of states.
- (2) Country Number. This document is assigned the country number for Austria, which is 63.
- (3) Subject Number (always follows the decimal point). The numerical-subject classification for Classes 7, 8, and 9 records is given on pages 1-17 of this Guide. In this example, the subject number 24 refers to "animal husbandry." Subject numbers may consist of any number of digits and may be combined with letters or words.
- (4) Document Number (always follows the slash). The number following the slash is a two-part number. The number preceding the hyphen indicates the month the document was created, and the numbers following the hyphen denote the day and year. In the example above, the document number shows that the document was created October 3, 1950.

USING THE MICROFILM

Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

- (1) Go to the microfilm Roll Contents beginning on page xv of this Guide. The Roll Contents gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.
- (2) Place this roll on the microfilm reader. Remembering that documents are filed in numerical order, turn to the desired document.

Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

- (1) Check the subject index for Classes 7, 8, and 9 beginning on page 19 of this Guide, to determine the file number of the topic that interests you.
- (2) Check the microfilm Roll Contents of the appropriate section to determine the roll or rolls of film on which documents with this file number appear.
- (3) Place the proper roll on the microfilm reader and turn to the desired document.

CITATION OF DOCUMENTS

A general form for citing documents from Decimal File 863, for example, is:

Independent London FREE PRESS said Rhee "seems to be confusing his right to continued rule with the survival of democracy in Korea." Editor said Rhee's course embarrassing to well-wishers of Korea and raises question "whether UN forces are fighting to preserve Rhee regime." Added that "UN reps must make sure Koreans have opportunity enjoy democracy we talk so loudly about."

USING THE MICROFILM

Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

- (1) Go to the microfilm Roll Contents beginning on page xv of this Guide. The Roll Contents gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.
- (2) Place this roll on the microfilm reader. Remembering that documents are filed in numerical order, turn to the desired document.

Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

- (1) Check the subject index for Classes 7, 8, and 9 beginning on page 19 of this Guide, to determine the file number of the topic that interests you.
- (2) Check the microfilm Roll Contents of the appropriate section to determine the roll or rolls of film on which documents with this file number appear.
- (3) Place the proper roll on the microfilm reader and turn to the desired document.

DEPT PASS PUSAN; SENT PUSAN, RPTD INFO DEPT 259.

Re DEPCIRTEL 999, May 30.

Reference (In this case, the telegram is in reference to State Dept. circular telegram no. 999 of May 30.)

Independent London FREE PRESS said Rhee "seems to be confusing his right to continued rule with the survival of democracy in Korea. Editor said Rhee's course embarrassing to well-wishers of Korea and raises question "whether UN forces are fighting to preserve Rhee regime." Added that "UN reps must make sure Koreans have opportunity enjoy democracy we talk so loudly about."
