Wilmington, Delaware

PUBLISHER'S NOTE

The materials in the Department of State file have been microfilmed in the exact order and condition in which they appear in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed prior to filming and replaced with notices identifying the item and the reason for its removal. Scholarly Resources does not claim copyright to the materials comprising this collection nor to the accompanying guide.

ACKNOWLEDGMENT

This Scholarly Resources microfilm publication of the Department of State Decimal Files is produced in cooperation with the National Archives and Records Administration, Washington, DC.

Scholarly Resources also publishes on microfilm *Records of the U.S. Department of State relating to Political Relations between the United States and Japan, 1910-1954.*

SR Microfilm Edition of
RECORDS OF THE U.S. DEPARTMENT OF STATE
RELATING TO UNITED STATES POLITICAL RELATIONS
WITH JAPAN, 1955-1959
and
POLITICAL RELATIONS OF JAPAN, 1955-1959

Scholarly Resources has published on microfilm the U.S. Department of State Decimal File 611.94 titled *Records Relating to United States Political Relations with Japan, 1955-1959* and Decimal File 694 titled *Records Relating to Political Relations of Japan, 1955-1959*.

The materials in these Decimal Files have been microfilmed in the exact order and condition in which they are found in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed prior to filming and have been replaced with notes indicating their absence.

The documents found in these files are predominantly instructions to and despatches from diplomatic and consular officials and are often accompanied by enclosures. Notes between the Department of State and foreign diplomats in the United States, memorandums prepared by State Department officials, and correspondence with officials of other government departments and with private businesses and persons also are included.

Decimal Files 611.94 and 694 are part of the General Records of the Department of State, National Archives Record Group 59.

THE DECIMAL FILING SYSTEM

From 1910 to 1963 the State Department used a decimal filing system to organize its central files, which subsequently became known as the "Decimal Files." This filing system is designed to permit access to the documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject.

Class. In 1950 the decimal filing system was reorganized to meet the changing needs of the State Department. The classes were expanded to ten, and the subject areas were redefined. The post-1949 classes are:

- Class 0: Miscellaneous
- Class 1: Administration of the U.S. Government
- Class 2: Protection of Interests (Persons and Property)
- Class 3: International Conferences, Congresses, Meetings, and Organizations, United Nations, Organization of American States, Multilateral Treaties
- Class 4: International Trade and Commerce, Trade Relations, Treaties, Agreements, Customs Administration
- Class 5: International Informational and Educational Relations, Cultural Affairs and Programs
- Class 6: International Political Relations, Other International Relations
- Class 7: Internal Political and National Defense Affairs
- Class 8: Internal Economic, Industrial, and Social Affairs
- Class 9: Other Internal Affairs, Communications, Transportation, Science

The records reproduced in this publication are from Class 6 for the period 1955-1959.

Country. The decimal filing system continues by assigning a number to each country, as well as to some larger geographic areas. The United States is always represented by the number 11, which follows the class number on the document in this publication; Japan is designated by the number 94, which appears on these documents following the decimal point. (A complete list of country numbers is available from Scholarly Resources.)

Subject. The class covering Political Relations is organized according to a subject classification system, in which each subject is assigned a number. The numerical-subject listing of documents for this class of records begins on page 1 of this *Guide*.

File Periodization

The State Department divided its Decimal Files into arbitrary sections by date: 1910–1929, 1930–1939, 1940–1944, 1945–1949, 1950–1954, 1955–1959, and 1960–1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that the Decimal Files are organized in these multiyear sections and cannot be accessed by individual years.

Document File Numbers

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 611.94, is shown below:

6	11	94	4	/	3-859
(1)	(2)	(2)	(3)		(4)

- (1) **Class Number.** This document is part of Class 6, pertaining to political relations of states.
- (2) **Country Number.** Each document includes two country numbers indicating the two countries between which the relationship exists. In this document, number 11 indicates the United States, and number 94 signifies Japan.
- (3) **Subject Number.** The number following the second country number refers to the subject of the document. (The numerical-subject listing of documents for Class 6 begins on page 1 of this *Guide*.) In this example, the number 4 denotes that the topic of the document involves matters of commerce and navigation.
- (4) **Document Number.** With the reorganization of the decimal filing system in 1950, the form of the document number changed and became a two-part number indicating the date on which the document was created. For example, a document originating on March 8, 1959, would have a document number ending /3-859; the number following the slant denotes the month, the one immediately after the hyphen shows the day, and the final two numbers signify the year.

USING THE MICROFILM

At the beginning of each roll of film, the researcher will find the *Guide*, consisting of a brief introduction, the numerical-subject listing of documents, and the roll contents.

Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

- (1) Go to the microfilm Roll Contents, which gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.
- (2) Place this roll on the microfilm reader. Remembering that the documents are filed in numerical order, turn to the desired document.

Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

- (1) Check the subject index of the printed *Guide* to determine the file number of the topic.
- (2) Check the microfilm Roll Contents to determine the roll or rolls of film on which documents with this file number appear.
- (3) Place this roll on the microfilm reader and turn to the material that you wish to examine.

CITATION OF DOCUMENTS

A general form for citing documents from Decimal File material is:

[Sender] to [recipient], [date], Department of State, Decimal File [appropriate file number],
General Records, Record Group 59, National Archives, Washington, DC.
