Guide to the
SR Microfilm Edition of
**RECORDS OF THE U.S. DEPARTMENT OF STATE RELATING TO THE
INTERNAL AFFAIRS OF KOREA, 1930-1949**
Decimal File 895

Scholarly Resources has published on microfilm the U.S. Department of State Decimal File 895 Records Relating to the Internal Affairs of Korea, for the years 1930-1939, 1940-1944, and 1945-1949.

The materials in this Decimal File have been microfilmed in the exact order and condition in which they are found in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed from the file prior to filming and are replaced with notes indicating their absence.

Decimal File 895 is part of the General Records of the Department of State, National Archives Record Group 59.

The documents in this file are primarily instructions to and despatches from U.S. diplomatic and consular staff regarding political, economic, military, social, and other internal conditions and events in Korea. Other types of material represented are reports and memoranda prepared by State Department staff, communications between the State Department and foreign governments, and correspondence with other departments of the U.S. government, private firms, and individuals.

THE DECIMAL FILING SYSTEM

From 1910 to 1963, the State Department used a decimal filing system to organize its central files, which consequently became known as the Decimal Files. This filing system is designed to permit access to documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject.

Class. There are nine numbered Classes in the decimal filing system, each of which designates a very broad subject area. These are:

- Class 0: General, Miscellaneous
- Class 1: Administration, U.S. Government
- Class 2: Extradition
- Class 3: Protection of Interests
- Class 4: Claims
- Class 5: International Conferences, Multilateral Treaties, Disarmament, League of Nations, and Interparliamentary Union
- Class 6: Commerce, Customs Administration, and Trade Agreements
- Class 7: Political Relations of States
- Class 8: Internal Affairs of States

The records reproduced in this publication are from Class 8.

Country. The decimal filing system continues by assigning a number to each country, as well as to some larger geographical areas. The United States, for example, is always represented by the number 11, and Korea is represented by the number 95. (A full list of country numbers is available from Scholarly Resources.)

Subject. Class 8 records are organized according to a very precise subject classification system, in which each subject is assigned a number. The generic numerical-subject classification for Class 8 records begins on page 1 of this Guide, and an alphabetical subject index begins on page 21.

File Periodization

The State Department divided its Decimal Files into arbitrary sections by date: 1910-1929, 1930-1939, 1940-1944, 1945-1949, 1950-1954, 1955-1959, and 1960-1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that Decimal Files are organized in these multiyear sections and cannot be accessed by individual years.

Document File Numbers

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 895, is shown below:

8 95 • 24 / 446
(1) (2) (3) (4)

- (1) Class Number. This document is part of Class 8, pertaining to internal affairs of states.
- (2) Country Number. This document is assigned the country number for Korea, which is 95.
- (3) Subject Number (always follows the decimal point). The numerical-subject classification of Class 8 records is given on pages 1 through 20 of this Guide. In this example, the subject number 24 refers to "military equipment and supplies." Subject numbers may consist of any number of digits and may be combined with letters or words. For instance, 895.114 Narcotics refers to the subject of traffic in liquor and habit-forming drugs and the subdivision of Narcotics.
- (4) Document Number (always follows the slash).

For sections 1930-1939 and 1940-1944: As they were assigned to a subject group, documents were numbered consecutively within that group. In this example, the document was 446th to be received on the subject of military equipment. Researchers should note that occasionally documents were numbered by filing date rather than date of receipt, so the files are not completely chronological.

For the section 1945-1949: From July 1944 on, the document number reflects the date of the document's creation. For example, a document dated November 20, 1944, would be numbered 11-2044. This numbering system is also used for documents that were created before July 1944 but not filed until after this date.

The List of Papers and the Purport Cards

The State Department prepared a List of Papers, or purport list, for each Decimal File up to 1944. This list records the documents in the order that they appear in the file. For each document, the List of Papers provides the document number; the place of origin and often the author; the date of origin; the divisions and offices within the State Department to which the document was forwarded; and an abstract of the contents. Beginning in 1944, the State Department switched to recording the same general information for each document on individual Purport Cards.

In this microfilm publication, the List of Papers or the Purport Cards corresponding to the documents on each roll of microfilm are included at the beginning of the roll. This serves as a convenient roll "table of contents." Researchers should note, however, that there are occasional discrepancies between what is listed and what actually appears in the file.

Mr. J. Jerome Williams and Mr. John W. Stagers informed Mr. Salisbury that they are lawyers in Washington, D. C., who have long been interested in Korean affairs; that they were calling in a private capacity as a result of conversations with Dr. Syngman Rhee, head of the Korean Commission in Washington, who desires their active participation in a Korean movement for independence; and that, before entering into such activity they wished to know the attitude of the Department in regard to the question of Korean independence. Mr. Salisbury replied that he was unable to reply on behalf of the Department but that his personal view was that activities in the United States at the present time looking toward the independence of Korea might have unfavorable reaction in Japan to the detriment of the welfare of American nationals who are still in Japan and Japanese-occupied
