Decimal File 860h

Scholarly Resources has published on microfilm the U.S. Department of State Decimal File 860h, Records Relating to the Internal Affairs of Yugoslavia, for the years 1945-1949.

The materials in this Decimal File have been microfilmed in the exact order and condition in which they are found in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed from the file prior to filming and are replaced with notes indicating their absence.

Decimal File 860h is part of the General Records of the Department of State, National Archives Record Group 59.

The documents in this file are primarily instructions to and despatches from U.S. diplomatic and consular staff regarding political, economic, military, social, and other internal conditions and events in Yugoslavia. Other types of material represented are reports and memoranda prepared by State Department staff, communications between the State Department and foreign governments, and correspondence with other departments of the U.S. government, private firms, and individuals.

## THE DECIMAL FILING SYSTEM

From 1910 to 1963, the State Department used a decimal filing system to organize its central files, which consequently became known as the Decimal Files. This filing system is designed to permit access to documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject.

**Class.** There are nine numbered Classes in the decimal filing system, each of which designates a very broad subject area. These are:

- Class 0: General, Miscellaneous
- Class 1: Administration, U.S. Government
- Class 2: Extradition
- Class 3: Protection of Interests
- Class 4: Claims
- Class 5: International Conferences, Multilateral Treaties, Disarmament, League of Nations, and Interparliamentary Union
- Class 6: Commerce, Customs Administration, and Trade Agreements
- Class 7: Political Relations of States
- Class 8: Internal Affairs of States

The records reproduced in this publication are from Class 8.

**Country.** The decimal filing system continues by assigning a number to each country, as well as to some larger geographical areas. The United States, for example, is always represented by the number 11, and Yugoslavia is represented by the number 60h. (A full list of country numbers is available from Scholarly Resources.)

**Subject.** Class 8 records are organized according to a very precise subject classification system, in which each subject is assigned a number. The generic numerical-subject classification for Class 8 records begins on page 1 of this Guide, and an alphabetical subject index begins on page 21.

## **File Periodization**

The State Department divided its Decimal Files into arbitrary sections by date: 1910-1929, 1930-1939, 1940-1944, 1945-1949, 1950-1954, 1955-1959, and 1960-1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that Decimal Files are organized in these multiyear sections and cannot be accessed by individual years.

## **Document File Numbers**

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 860h, is shown below:

8    60h   •   24   /   11-2044

(1)   (2)   (3)   (4)

- (1) **Class Number.** This document is part of Class 8, pertaining to internal affairs of states.
- (2) **Country Number.** This document is assigned the country number for Yugoslavia, which is 60h.
- (3) **Subject Number** (always follows the decimal point). The numerical-subject classification of Class 8 records is given on pages 1–20 of this Guide. In this example, the subject number 24 refers to "military equipment and supplies." Subject numbers may consist of any number of digits and may be combined with letters or words. For instance, 860h.114 Narcotics refers to the subject of traffic in liquor and habit-forming drugs and the subdivision of Narcotics.
- (4) **Document Number** (always follows the slash). From July 1944 on, the document number reflects the date of the document's creation. For example, a document dated November 20, 1944, would be numbered 11-2044. This numbering system is also used for documents that were created before July 1944 but not filed until after this date.

## **Purport Cards**

Beginning in 1944, the State Department prepared Purport Cards for each Decimal File. This card file records each document as it appears in the file. For each document, the card provides the document number, the place of origin and often the author, the date of origin, the divisions and offices within the State Department to which the document was forwarded, and an abstract of its contents or basic subject.

In this microfilm publication, the Purport Cards corresponding to the documents on each roll of microfilm are included at the beginning of the roll. This serves as a convenient roll "table of contents." Researchers should note, however, that there are occasional discrepancies between what is listed and what actually appears in the file.

A Purport Card and a first page of a document are located on pages viii and ix of this Guide. These samples have annotations pointing out the location of specific information that researchers may find useful.

## USING THE MICROFILM

At the beginning of the first microfilm roll of each of the three sections of Decimal File 860h the researcher will find the following:

- The numerical-subject classification of Class 8 records
- The roll contents of the entire section
- The Purport Cards relevant to the documents on that particular roll.

On each subsequent microfilm roll, only the relevant section of the Purport Cards appears.

### Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

- (1) Go to the microfilm roll contents for the appropriate section, either in this Guide or at the beginning of Roll 1 of the microfilm. The roll contents gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.
- (2) Place this roll on the microfilm reader. Remembering that documents are filed in numerical order, turn to the desired document.

### Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

- (1) Check the subject index for Class 8 records, located on page 21 of this Guide, to determine the file number of the topic that interests you.
- (2) Check the microfilm roll contents of the appropriate section to determine the roll or rolls of film on which documents with this file number appear.
- (3) Placing an appropriate roll of film on the reader, turn to the Purport Cards at the beginning and scan the abstracts for documents with this file number. Note the document numbers of any that seem promising.
- (4) Using these document numbers, turn in the roll of film to the material you wish to examine.

Subject: Yugoslav Press Attack on Bishop DIONISIJE  
and the Serbian Orthodox Church

Section from Politika,  
No. 24, "The Traitorous  
Activity of Bishop Dionisijs"

Receipts by  
divisions of  
the State Dept.

THE HONORABLE

THE SECRETARY OF STATE

WASHINGTON.

SIR:

I have the honor to transmit herewith, in translation, Politika's leading editorial of October 24 entitled, "The Traitorous Activity of Bishop Dionisijs".

Reference is made to this Embassy's Telegram No. 1386, October 26, summarizing and commenting on this article, and to this Embassy's Telegram No. 574, May 6, which presented what may perhaps be the background of the present attack.

The Embassy's biographic files contain no information concerning the Reverend Miodir DUBAK, who, Politika reports, is now the Orthodox priest at Lackawanna, New York. The allegations of the article regarding his record as a war criminal, consequently, cannot be verified or appraised here. Vojislav GACINOVIC, who is stated to have been unfrocked by Bishop Dionisijs is believed to have returned to Yugoslavia. One report has reached the Embassy that Mr. Gacinovic was deported from the United States but no corroboration is at hand.

This editorial under enclosure is the first public attack on the Serbian Orthodox Church which is believed to have been made in Yugoslavia for over a year. The Yugoslav Government has, however, long been dissatisfied with the situation of the Orthodox Church in North America and it is not improbable that attempts will be made to produce a more complaisant attitude on the part of Orthodox clergy in the United States.

Respectfully yours,

For the Ambassador:

William Leonhart  
Second Secretary
