PUBLISHER'S NOTE

While in operation, there was generally a MAGIC Summary prepared daily, and these were later bound into volumes. Each Summary - each day - begins over again at page one, but each Summary has been given a document number (handwritten in the upper righthand corner of each p. 1), so will be listed in this Guide by that number, followed by the date, headings included, the page numbers of any charts, maps or reports of special interest, and the approximate number of pages in each Summary (the final number of each listing, all by itself in parentheses; at the end of the listing for each volume's title page, approximate totals are also listed), in order that approximations can be made of how far to go into a reel for a specific date.

If there's an occasional slight shuffling of chronology in the background documents, they were shot in the order in which they came to us, bound together. The MAGIC Summaries themselves were microfilmed by the Government, and chronological shuffling (particularly noticeable in May and June of 1942) seems to be the result of the order in which the Summaries were originally bound. Any gaps are the result of non-declassification.
