## INTRODUCTION

This micropublication reproduces the U.S. Department of State Decimal Files 794, 894, and 994, entitled *Records Relating to the Internal Affairs of Japan*, for the years 1950–1954. The documents found in these files are predominately instructions to and despatches from U.S. diplomatic and consular personnel regarding political, military, economic, social, and other internal conditions and events in Japan. Other types of documentation included are reports and memoranda prepared by the State Department staff; communications between the State Department and foreign diplomats; and correspondence with other U.S. Government departments, private firms, and individuals.

The materials in these files have been reproduced in the exact order and condition in which they appear in the holdings of the National Archives and Records Administration. All documents in the files that have been declassified appear on the microfilm. Those few documents that remain classified were removed from the files prior to filming and replaced with notices identifying the material and the reason for removal.

Decimal Files 794, 894, and 994 are part of the General Records of the Department of State, Record Group 59.

## THE DECIMAL FILING SYSTEM

From 1910 to 1963, the State Department used a decimal filing system to organize its central file in which documents were arranged by subject according to predetermined file numbers. The Department used essentially the same classification scheme from 1910 through 1949. During this period, the decimal file consisted of nine broad subject areas known as classes, numbered 0 through 8. Scholarly Resources micropublications of decimal file documents dated prior to 1950 are predominately from Class 8, the designation for materials on internal affairs of states. Class 8, which consists of documentation on all aspects of the internal situation of a given country from political affairs to industrial matters, is generally the category of greatest significance to scholars.

In 1950 the State Department modified the decimal file, but without changing the basic structure. The complexity of the postwar world and the increasing involvement of the United States in international affairs had combined to make the 1910 filing system, last updated in 1939, inadequate to meet the Department's growing needs. The updated decimal file was still based on classes, but the old nine classes were rearranged, abolished, or subdivided. For example, Class 8 in the old system becomes Classes 7 (internal political and national defense affairs), 8 (internal economic, industrial, and social affairs), and 9 (other internal affairs, communications, and transportation). As with the previous system, four elements were employed to generate a file number. An example of a document from Decimal File 794 is explained below:

7	94	•	563	/	7 - 2151
(1)	(2)		(3)		(4)

(1) *Class number.* Decimal file numbers begin with the class. All of the documents in this micropublication are in Classes 7, 8, and 9.

(2) *Country number.* This is the assigned number for the geographical region or country to which the document pertains. All documents in this micropublication are country number 94, the general designation for Japan.

(3) *Subtopic number* (follows the decimal point). Within each decimal file class, the subject of documents is further defined by numerical subtopics. The numerical-subject listing for Class 7 appears on page 1 of this guide. This listing shows that subtopic 563 covers "Military bases and posts."

(4) *Document number* (follows the slash). Within each subtopic group, documents are filed in chronological sequence. Beginning in July 1944, the system of assigning sequential numbers to documents within each subtopic was abandoned in favor of using the date of a document as its individual number. In this example, the document number, as well as the date, is July 21, 1951. It is not uncommon to find more than one document in a particular file bearing identical file numbers, since a number of documents on a particular issue often were generated within a single day.

### The First Page of a Document

A sample document appears on page xii of this guide with explanatory notes. This telegram by no means represents all documents found in the files reproduced in this micropublication, but its format and annotations are illustrative of many documents found in the 1950–1954 decimal file. Shown at the top left of the document are the Foreign Service post sending the telegram, the recipient (usually the Secretary of State), the telegram number, and the date and the time of transmission. Also at the top left are instructions for the dissemination of the telegram: "action" indicates the office designated to act on information in the telegram and "info" the offices to be informed of its message. At the top right are shown the date and time the telegram was received by the Department. The file number always appears on the right side of the document.

## MATERIALS APPEARING ON EACH ROLL OF FILM

On each roll of film in this micropublication, the user will find the following in the order listed:

1. An introduction to Decimal Files 794, 894, and 994 and an explanation of the filing system;
2. Abbreviations frequently used in the 1950–1954 files;
3. An outline of the numerical-subject categories in Classes 7, 8, and 9;
4. The range of documents, by file number, reproduced on that roll; and
5. The documents themselves, in numerical sequence.

## LOCATING DOCUMENTS ON MICROFILM

Thousands of documents are reproduced in this micropublication, but thanks to the decimal filing system, researchers should have little problem locating information on a particular topic. Assuming that one has a topic in mind, one should follow these steps:

1. Consult the numerical-subject listing for Classes 7, 8, or 9 to determine the subtopic file number of documents on this topic. (This listing appears both in this guide and on each roll of film.)

Example: Say the topic of interest is the manufacture of silk in Japan. Reading down the numerical-subject listing in Class 8, one sees that subtopic number 355 applies.

2. Consult the roll contents to determine the roll(s) of film on which the documents with this subtopic appear. (Roll contents appear both in this guide and on each roll of film.)

Example: The roll contents indicate that documents numbered 894.355 are found on roll 41.

3. Turn the roll of film to find these documents.

Independent London FREE PRESS said Rhee "seems to be confusing  
his right to continued rule with the survival of democracy in  
Korea." Editor said Rhee's course embarrassing to well-wishers  
of Korea and raises question "whether UN forces are fighting to  
preserve Rhee regime." Added that "UN reps must make sure  
Koreans have opportunity enjoy democracy we talk so loudly about."
