RECORDS OF THE U.S. DEPARTMENT OF STATE RELATING TO  
INTERNAL AFFAIRS OF KOREA, 1955-1959

Scholarly Resources has published on microfilm the U.S. Department of State Decimal Files 795, 795B, 895, 895B, 995, and 995B titled *Records Relating to Internal Affairs of Korea, 1955-1959*.

The materials in these Decimal Files have been microfilmed in the exact order and condition in which they are found in the holdings of the National Archives and Records Administration. Those documents that have not yet been declassified were removed prior to filming and have been replaced with notes indicating their absence.

The documents found in this file are predominantly instructions to and despatches from diplomatic and consular officials and are often accompanied by enclosures. Notes between the Department of State and foreign diplomats in the United States, memorandums prepared by State Department officials, and correspondence with officials of other government departments and with private businesses and persons also are included.

Decimal Files 795, 795B, 895, 895B, 995, and 995B are part of the General Records of the Department of State, National Archives Record Group 59.

## THE DECIMAL FILING SYSTEM

From 1910 to 1963 the State Department used a decimal filing system to organize its central files, which subsequently became known as the "Decimal Files." This filing system is designed to permit access to the documents by subject. It uses a numerical-subject organization that has three major parts: Class, Country, and Subject. The numerical-subject listing of documents for Classes 7, 8, and 9 begins on page 1 of this *Guide*.

**Class.** In 1950 the system was reorganized to meet the changing needs of the State Department. The classes were expanded to ten, and the subject areas were redefined. The post-1949 classes are:

- Class 0: Miscellaneous
- Class 1: Administration of the U.S. Government
- Class 2: Protection of Interests (Persons and Property)
- Class 3: International Conferences, Congresses, Meetings, and Organizations, United Nations, Organization of American States, Multilateral Treaties
- Class 4: International Trade and Commerce, Trade Relations, Treaties, Agreements, Customs Administration
- Class 5: International Informational and Educational Relations, Cultural Affairs and Programs
- Class 6: International Political Relations, Other International Relations
- Class 7: Internal Political and National Defense Affairs
- Class 8: Internal Economic, Industrial, and Social Affairs
- Class 9: Other Internal Affairs, Communications, Transportation, and Science

The records reproduced in this publication are from Classes 7, 8, and 9 for the period 1955-1959. For this particular decimal file, a further distinction was made between Korea as a whole and South Korea. All of the files pertaining only to South Korean matters are designated by the letter "B" (e.g., 795B, 895B, and 995B).

**Country.** The decimal filing system continues by assigning a number to each country, as well as to some larger geographic areas. Korea is designated by the number 95, which appears on these documents preceding the decimal point. (A complete list of country numbers is available from Scholarly Resources.)

**Subject.** The classes covering Internal Affairs are organized according to a subject classification system, in which each subject is assigned a number.

### File Periodization

The State Department divided its Decimal Files into arbitrary sections by date: 1910–1929, 1930–1939, 1940–1944, 1945–1949, 1950–1954, 1955–1959, and 1960–1963. Each section is treated as a separate filing unit, organized by the numerical-subject classification system. Within each section, therefore, all the documents pertaining to a particular subject are filed together. It is important for researchers to remember that the Decimal Files are organized in these multiyear sections and cannot be accessed by individual years.

### Document File Numbers

In the decimal filing system, each document is assigned a file number that reflects four pieces of information. An example, using a document in Decimal File 795, is shown below:

7	95	•	4	/	3-859
(1)	(2)		(3)		(4)

- (1) This document is part of Class 7, pertaining to internal political and national defense affairs.
- (2) Country Number. This document is assigned the country number for Korea, which is 95.
- (3) Subject Number (always follows the decimal point). The numerical-subject classifications of Classes 7, 8, and 9 begin on page 1 of this *Guide*. In this example, the number 4 denotes that the topic of the document involves international courts.
- (4) Document Number. With the reorganization of the decimal filing system in 1950, the form of the document number changed and became a two-part number indicating the date on which the document was created. For example, a document originating on March 8, 1959, would have a document number ending /3-859; the number following the slant denotes the month, the one immediately after the hyphen shows the day, and the final two numbers signify the year.

## USING THE MICROFILM

At the beginning of each roll of film, the researcher will find the *Guide*, consisting of a brief introduction, the numerical-subject listing of documents, and the roll contents.

### Locating a Document by File Number

When you know the file number of a document and wish to locate it on the microfilm, follow these steps:

- (1) Go to the microfilm Roll Contents, which gives the file number of the first and last document on each roll. Using this information, determine the appropriate roll.
- (2) Place this roll on the microfilm reader. Remembering that the documents are filed in numerical order, turn to the desired document.

### Locating a Document by Subject

When you want to examine documents addressing a particular subject, follow these steps:

- (1) Check the subject index of the printed *Guide* to determine the file number of the topic.
- (2) Check the microfilm Roll Contents to determine the roll or rolls of film on which documents with this file number appear.
- (3) Place this roll on the microfilm reader and turn to the material that you wish to examine.

## CITATION OF DOCUMENTS

A general form for citing documents from Decimal File material is:

[Sender] to [recipient], [date], Department of State, Decimal File [appropriate file number], General Records, Record Group 59, National Archives, Washington, DC.

Jarring states that Swedish Foreign Office has only brief summary of 480-word Chinese reply on NNSC. Full text being pouched from Peking. Substance Peking's telegram repeated Boheman last evening and assume Department informed.

Foreign Office queried their Embassy Peking re reference consultation other nations and following is text this portion Chinese note: "Concrete methods for reduction can be decided upon through consultation among nations on NNSC".

Jarring speculated that such consultation with Poles and Czechoslovaks could take place either in NNSC or at diplomatic level between Foreign Ministries. Intimated that he favored latter method but no (repeat no) decision taken. Jarring said Swedes would take no action until our reply received which he assumed would not be long delayed. Swedes had not intended to give any press publicity to Chinese reply and were surprised (and I gather annoyed) at Swiss release made without prior consultation with Swedes.
