INTRODUCTION

The **History of Education**, a retrospective monograph collection on microfiche, consists of educational treatises and general works in education published from the fifteenth through the nineteenth centuries. As a research collection, **History of Education** is designed to be comprehensive in scope, encompassing five centuries of published educational material. Modern educational theory and practice has been profoundly influenced by the major writers contained in this collection. The **History of Education** will be based on the extensive holdings of the Milbank Library, Teachers College at Columbia University, and the inclusion of holdings from other institutions is in the planning stages.

The collection will be published four times yearly and each unit will contain approximately 1,250 microfiche cards. Unit 12 contains microfiche numbers 13,759 - 15,008 and a total of 566 titles. This unit continues in the subject area of nineteenth century American and British university education, but also includes works on higher education and educational legislation from Germany, France and Great Britain. Titles by John Cook, Victor Cousin, Edward Everett, Curt Müller, Samuel Wilderspin are included in unit 12.

The **History of Education** collection will eventually contain 9,000 to 12,000 titles on 49-frame positive microfiche with a reduction ratio of 24x. This film, employing a silver halide emulsion, meets all industry standards for archival permanence. The microfiche heading has been designed to industry standards. The eye-legible, abbreviated title of each work is centered on the top line of the Document Description Area, with the author and imprint date appearing directly beneath. The information contained in the right-hand field of the heading, the Sequential Information Area, offers identification unique to the work: the sequential fiche number, the number of fiche cards containing that title, their order of sequence, and the number of pages contained on the card. The Identification Area is left blank for local information which libraries may wish to add to the heading. Each entry in this guide contains the main entry, title, imprint information, and its sequential fiche number, or range of numbers.

This guide provides dual access--by main entry and by fiche number. Each entry has been checked in the Library of Congress Name Authority File. If not found, it is searched in the NUC Pre-1956 Imprints and, finally, in one of the national bibliographies. In the event that a name does not appear in any authority source, the title page form is used. Fiche numbers follow each record and correspond to the numbers in the upper right corner of each microfiche.
