Notes on the Use of United States Supreme Court Microfilm Indexes

For the period 1832 - 1860 (Part I) the cases from the principal collections used in this series were not arranged in the sequence found in the U.S. Reports; instead, the cases were paginated continuously through the volumes in each term, and an alphabetical index of cases was provided in the first volume of each term. Scholarly Resources decided that a more efficient index should be available to researchers, and, therefore, our index for 1832 - 1860 not only lists all the cases in the Records and Briefs, but it also provides the U.S. Reports citation for each case, and, of course, the number of the microfilm reel in which each case can now be found.

Parts II and III which cover the period 1861 - 1880 reveal a slightly different index arrangement. The design is as follows: First, for the years 1861 - 1871 a copy of the alphabetical table of cases for the volumes of the U.S. Reports is provided (columns A and B). Then, on the right-hand margin of each case, we have designated the number of the reel in which the case appears in the microfilm set of the Records and Briefs (column C). The period 1872 - 1915 (section B of Part III through Part IX) is arranged so that the contents of each volume in the Records and Briefs are keyed to the pages in the U.S. Reports in which these cases appear. Since the organization of the Records and Briefs after 1872 parallels exactly the sequence of cases in the U.S. Reports, our index provides only the page number from the Reports for the first and last case.

Researchers will also note that there are some case records which appear in the Records and Briefs but were not reported in the U.S. Reports. These cases appear to have been brought before the Supreme Court but were denied certiorari.
