## PUBLISHER'S NOTE

Research Publications (incorporating Harvester Microform) already have available an unparalleled microfiche library of British Political Pamphlets. This collection adds depth and range to the material already reproduced and is a landmark in Labour publishing. As part of the famous independent Labour Party Archives, the pamphlets included are those received, acquired, and purchased since the formation of the Independent Labour Party in 1893 though many pamphlets predate this and the series begins in 1884.

The ILP became the largest and most influential of British socialist organisations and its history is in large part the story of the early growth of working-class parliamentary power. The pamphlets here illustrate what influenced the ILP, what was read, the personal connections of the main protagonists, the organisation exchanges with groups and parties, the full range of the social, cultural and political concerns and how they were often inextricably combined.

Every attempt has been made to avoid duplication of material available elsewhere in our pamphlet and leaflet collection and certain groups and parties have been omitted. Thus we have not included material from the British Labour Party, the TUC, the Fabian Society (apart from some rare local branch material), the Social Democratic Federation, and the War Resisters' International.

Part One of the series covers the years 1884-1897; Part Two the years 1898-1902; Part Three the Years 1903-1907; Part Four the years 1908-1911 and Part Five the years 1912-1918. This Sixth Part includes the years 1919-1925. The fiche numbering of all parts within this series is continuous.

It is only possible to hint at the richness of this collection but the range of pressure groups and radical presses in Part Six includes The Plebs League, Temple Press Ltd., Socialist Labour Party, Communist Party of Great Britain, The Peace Pledge Union, The Talbot Press and The Pioneer Press - and a great many others. Though the coverage of any one group is not definitive, the collection as a whole makes easily accessible a corpus of material which offers new insights into the concerns of the day and will be welcomed by all social and labour historians.

The series is published in parts in chronological order. A complete listing appears at the beginning of each part with the relevant section of the listing being reproduced again at the beginning of each year. An author index appears on the first fiche of each part.

Many of the pamphlets and leaflets are undated. After discussing the problem with librarians and scholars Research Publications has given a date of publication to all items - with a varying degree of certainty and accuracy. Where the date of publication, within two or three years, has been inferred from reliable internal or external evidence, it appears thus: 1919? If there is no evidence for a more accurate date than within five or ten years, it appears thus: c1919?

All documents on the listing have been numbered with a code indicating the year of issue and the number of each document within the year of issue. Thus 1919/6 means that this is the sixth document in the 1919 listing. The material has been filmed in the order of the listing. The contents of each fiche are clearly shown on the fiche headers, and in this particular case the document's

reference on the header reads 1919; 1919/5(cont.) -- 1919/9. Document 1919/6 appears on this fiche and can be easily traced.

A group/organisation cumulative index will be prepared as the programme proceeds, but this will not be issued until nearer the completion of the series. A cumulative author index will also be issued. Usually London is the place of publication when none is given and, when there is no significance in the publishing body, only the town of publication is given. When complete this will be a microfiche library of the greatest significance offering a new body of research and insights into a great mass of little known or unknown socialist presses and pressure groups.

Attention should be drawn to the nature of some of the original material. This was sometimes produced with an eye to economy and printed on poor paper; and a number of the covers have been printed black on dark red. These original characteristics occasionally present difficulties of image and contrast which stringent tests and camera alterations cannot entirely overcome. 'Best Copy Available' targets have been inserted where applicable and every effort has been made to minimise these difficulties. We have sought to exercise the most responsible care in the production of this unique pamphlet collection and to meet the standards established by the Association for Information and Image Management (AIIM) and the American National Standards Institute (ANSI).

**COMPLETE LISTING**

**1919-1925**

PAMPHLETS AND LEAFLETS  
OF SOCIAL AND REFORM MOVEMENTS SINCE 1884

1919
