TECHNICAL NOTE

The Harvester Press has set itself the highest standards in the field of archivally-permanent library microfilming. Our microform publications have been prepared and produced in accordance with recommended and established guide-lines for the production of microforms of superior quality. These conform to the recommendations of the standard guides to good microfilming and micropublishing practice.

Attention should be drawn to the nature of the original material. Much of the material was produced with an eye to economy, printed on poor paper or duplicated. These original characteristics present difficulties of image and contrast which stringent test and camera alterations cannot entirely overcome. Every effort has been made to minimise these difficulties. We have sought to exercise reasonable care in the production of this unique collection and to meet the standards established by the National Microform Association (NMA) and the American National Standards Institute (ANSI).
