TECHNICAL NOTE

Primary Source Media has set itself the highest standards in the field of archivally-permanent library microfilming. Our microfilm publications conform to the recommendations of the guides to good microfilming and micropublishing practice and meet the standards established by the Association for Information and Image Management (AIIM) and the American National Standards Institute (ANSI).

Attention should be drawn to the nature of the original material. Printed material within this update of British Contemporary Press sometimes consists of pages possessing intricate designs and details in a variety of inks which renders the original document difficult to read. These original characteristics present difficulties of image and contrast which stringent tests and camera alterations cannot entirely overcome. Every effort has been made to minimise these difficulties though there are some pages which have proved impossible to reproduce satisfactorily. Conscious of this we have chosen to include these pages in order to make available the complete volume, bundle or file.

PUBLISHER'S NOTE

British Contemporary Press during 1998 contains a wide variety of British based journals and magazines published during 1998. The material covers a wide variety of topics from socialism to environmental and gender issues which, as a whole, reveal the nature of social issues within Britain and help chart changing attitudes.

The material printed by each group is listed and filmed chronologically by date of publication or issue number. The Participating Publications section which follows lists alphabetically all the material which is included in this update of the *British Contemporary Press* microfilm collection.

PARTICIPATING PUBLICATIONS

This list shows all the publications included in the 1998 update of *The British Contemporary Press*. Descriptions for the publications and the groups that publish them can be found in the printed guide that accompanies the microfilm collection.
