TECHNICAL NOTE

Harvester Microform has set itself the highest standards in the field of archivally-permanent library microfilming. Our microform publications have been prepared and produced in accordance with recommended and established guide-lines for the production of microform of superior quality. These conform to the recommendations of the standard guides to good microforming and micropublishing practice.

Attention should be drawn to the nature of the original material. Some was produced with an eye to economy and printed on poor quality paper. Other items were produce with deliberate eye-catching effects on glaring coloured paper. These original characteristics present difficulties of image and contrast which stringent tests and camera alterations cannot entirely overcome. Micromedia have exercised the most responsible care in the filming of this collection and this microfilm publication meets the standards established by the Association for Information and Image Management (AIIM) and the American National Standards Institute (ANSI).
