HARVESTER/PRIMARY SOCIAL SOURCES

Harvester/Primary Social Sources was established by The Harvester Press in 1972. The first collection Britain and Europe since 1945, was published in 1973. Harvester/PSS seeks to close a major gap in library coverage of the primary materials of current political and social debates, and to make possible the retrospective acquisition of these crucial social documents. It makes available for the first time ever complete bibliographic descriptions of the enormous output of a large number of contemporary British pressure groups, both current and retrospective. Simultaneously it supplies the material in 'packages' comprising silver-halide archivally-permanent microfiche, 4 ins X 6 ins (105mm X 148mm), with a maximum of 98 frames and 35mm silver-halide archivally-permanent positive microfilm. (These are not alternative formats; some 'packages' are published with part of the material on fiche and part on roll-film). The entire programme is divided into systematically-organised thematic 'packages'. There is a separate index for each.

Harvester/PSS has been created with the close co-operation and assistance of several hundred issuing bodies, groups and publishers. The most thorough and conscientious efforts are made to ensure the integrity and comprehensiveness of coverage of all material published on the subject of each 'package' by the participating groups. We believe that the inception and development of Harvester/PSS is a major breakthrough in publishing, bibliographic control and reference services and that it will have significant educational consequences. Now all libraries and scholars can acquire at modest cost material that no library anywhere in the world can offer its users.

TECHNICAL NOTE

Harvester Microform has set itself the highest standards in the field of archivally-permanent library microfilming. Our microform publications have been prepared and produced in accordance with recommended and established guide-lines for the production of microform of superior quality. These conform to the recommendations of the standard guides to good microforming and micropublishing practice.

Attention should be drawn to the nature of the original material. Some was produced with an eye to economy and printed on poor quality paper. Other items were produce with deliberate eye-catching effects on glaring coloured paper. These original characteristics present difficulties of image and contrast which stringent tests and camera alterations cannot entirely overcome. Micromedia have exercised the most responsible care in the filming of this collection and this microfilm publication meets the standards established by the Association for Information and Image Management (AIIM) and the American National Standards Institute (ANSI).

THE LEFT IN BRITAIN - PART THREE

1979 - 1987 UPDATE

This is the second update of the Harvester/PSS collection, **The Left in Britain - Part Three**. It comprises an entire run of the journal **Socialist Standard** 1979 - 1987.

The contents page shows how the material has been divided - for ease of reference we also provide subsidiary targets, bearing the name of the journal and the date of the issues to follow, before the issues of each year.

The Left in Britain is a continuing programme. Each part being updated with fresh material on microfiche and microfilm. Roll-film is numbered throughout the package in the sequence in which it is produced. Thus, these reels are numbered 99 - 100, whilst the material on them is a direct continuation of the 1973 - 1978 material on reels 56 - 59.
