BRITAIN AND EUROPE DURING 1986

This bibliographical guide to Britain and Europe during 1986 accompanies the Harvester/PSS microfiche collection of material produced throughout 1986. It is the fourteenth supplement to the 'package' Britain and Europe since 1945, (previously published by Harvester), which contains 26,000 pages of literature issued by 67 groups and organisations between 1945-1972. This update includes material contributed by 32 groups and organisations and, in addition to material produced in 1986, there are a number of items of an earlier date, not previously included.

The EEC year started promisingly and positively. Spain and Portugal officially became members of the Community on January 1 1986 bringing the total number of member states to 12 (Belgium, France, The Federal Republic of Germany, Italy, Luxemburg, and The Netherlands were the original member states of 1958; Britain, Ireland and Denmark joined in 1973, and Greece joined in 1981). Also on January 1 Finland became a full member of the allied European Free Trade Association, and the long running fishing disputes were partially resolved by establishing new fishing quotas. On January 20 President François Mitterand and Prime Minister Margaret Thatcher finally agreed upon a rail-only tunnel to link Britain to mainland Europe, and a provisional treaty endorsing this agreement was signed on February 12 1986 in Canterbury. There could be no more dramatic evidence of Britain's intention to be a part of Europe. Foreign policy issues restored tension within the Community. The American air-strike on Libya in April, from British bases, was condemned by the other member states. The question of sanctions to be imposed on South Africa was the central issue of the 34th European Council at the Hague in June and Britain opposed the recommendations of the other European countries. Both issues increased British isolationism and continuing disagreements on CAP (the Common Agricultural Policy), monetary policies (especially Britain's non-membership of the European Monetary system), and the Community budget destroyed the prospect of harmony within the Community. The British (Conservative) government is still pledged to membership, and only the prospect of a British Election in 1987 will re-ignite the debate over membership - as the Labour Party, if elected, would consider Britain's withdrawal.

PLACE/DATE OF PUBLICATION/AUTHORSHIP

Publication dates are given as in the original imprint, except for undated items. Where the date of publication (or origination) has been inferred from reliable internal or external evidence the conventional form has been adopted: n.d. 1986? Where no named author is listed the item was issued anonymously. The place of publication is normally the address of the issuing body.

HOW TO USE THE INDEX

As with the first collection and previous updates concerned with the Common Market debate, this update - which contains 1986 material issued during 1986 is arranged on the same easily-used and fully-indexed system. In a matter of moments the index takes you from your need for a particular item to the exact document you require.

HARVESTER/PSS UNIQUE PAGE NUMBERS

The Harvester/PSS unique page number again appears in the top left-hand corner of each page. As before the number on the first page of each document is the reference allocated to that particular document. This is the reference you will find in the index. Thus an item of 16 pages with the page numbers, say 80 - 95, will be identified by number 80. The numbering of each group in the 1986 update follows in sequence from the numbering of the material produced by the group in the last collection. For example, the last page of Agenor in Britain and Europe during 1985 was numbered 4003 so the first page of Agenor in the 1986 update is 4004.

HOW TO FIND AN INDIVIDUAL ITEM ON MICROFICHE

This follows the same principles as in the previous collection. Consult either the Chronological Index, the Author Index, or the Title Index to find the title you want. Each document has been allocated a two-letter code. Before this code is a number, which identifies the 'package' followed by 1986 in brackets, which signifies the year of the update. The number after the two letter code is the number of the specific document.

Suppose you want to read the European Democratic Group Pamphlet by Nicholas Bethell entitled Why do we sell butter to Russia?, issued in 1986? You can look for it in any of three places.

A. Chronological Index

You know that the item was issued by the European Democratic Group. In the Chronological Index this group is given the Britain and Europe since 1945 package number 1, the update number (1986) and the two-letter code LA. Thus the European Democratic Group looks like this:

1(1986)LA

1 is the 'package' reference. (1986) is the year of the update. LA is the group reference.

Each document has been allocated a unique number within the group and this particular document will look like this:

1(1986)LA 3536	BETHELL, Nicholas. <u>Why do we sell butter to Russia?</u> n.d. 1986?, 12pp.
----------------	--

B. Author Index

1(1986)LA 3536 is the unique code for this specific document and in the Author Index it appears like this:

Bethell, Nicolas, Why do we sell butter to Russia?
European Democratic Group, n.d. 1986?, 12pp.
1(1986)LA 3536.

C. Title Index

In the Title Index it appears like this:

Why do we sell butter to Russia?, by Nicholas Bethell.
European Democratic Group, n.d. 1986?, 12pp.
1(1986)LA 3536.

When you have the complete code for the document, find the 'package' in the Harvester/PSS collection. This is easily identified through the eye-readable name of the 'package' and through the 'package' number '1' which preceds each code. To identify the year of the update look at the date in brackets next to the package number e.g. (1986).

Then locate the group by the two-letter code. Then pick out the fiche on which the document number appears. Several documents are often filmed on one fiche and the fiche reference will read 1(1986)LA 3481 - 3547. Your document 1(1986)LA 3536 will appear on this fiche.

Insert the fiche in the micro-viewer and move the fiche to read the document you want.
