## INTRODUCTION

The **History of Education**, a retrospective monograph collection on microfiche, consists of educational treatises and general works in education published from the fifteenth through the nineteenth centuries. As a research collection, **History of Education** is designed to be comprehensive in scope, encompassing five centuries of published educational material. Many of the educators whose works are contained in this collection had a powerful influence not only in their own countries but throughout the Western world. Controversial aspects of their thought are often still of vital interest. The **History of Education** will be based on the extensive holdings of the Milbank Library, Teachers College at Columbia University, and the inclusion of holdings from other institutions is in the planning stages.

Each unit of the collection will contain approximately 1,250 microfiche cards. This temporary guide has been produced to provide access to Unit 5 of the microfiche collection. The subject of manual training, begun in Unit 4, continues in Unit 5. There are many works on Sloyd and vocational education in various grades and types of schools and public institutions. Also found are books and pamphlets on handicraft (including needle work, clay modelling, and woodworking). Additional subjects in this unit include the theory and practice of elementary education, school administration and discipline, and school hygiene. The subject of hygiene begins in this unit with works showing concern about child health, including vision, and then continues into the areas of design of school playgrounds and physical education, overlapping with the therapeutic aspects of gymnastics and exercise, well-represented subjects in Unit 6.

The microfiche heading has been designed to industry standards. The eye-legible, abbreviated title of each work is centered on the top line of the Document Description Area, with the author and imprint date appearing directly beneath. The information contained in the right-hand field of the heading, the Sequential Information Area, offers identification unique to the work: the sequential fiche number, the number of fiche cards containing that title, their order of sequence, and the number of pages contained on the card.

WOLFGANG RATICHUS...  
W. RATICH.  
HISTORY OF EDUCATION

FICHE 1283 →  
CARD 1 of 3  
pp.[1]-77

This guide provides dual access--by main entry and by fiche number. Each entry has been checked in the Library of Congress Name Authority File. If not found, it is searched in the NUC Pre-1956 Imprints and, finally, in one of the national bibliographies. In the event a name does not appear in any authority source, the title page form is used. Fiche numbers follow each record and correspond to the numbers in the upper right corner of each microfiche.

#### Sample Entry

RATICH, Wolfgang, 1751-1635.  
Wolfgang Ratichius, oder, Ratke :  
im Lichte Seiner und der Zeitgenoussen  
Briefe und als Didacticus in Gothen  
und Magdeburg / Originalbeitrag ...  
von G. Krause. -- Leipzig : Dyk, 1872.
